

OmniGlobe installed in the Visitor's Center at Biosphere 2

March 2011 – ARC Science Simulations installed our 32” OmniGlobe spherical display system in the Visitor's Center at the University of Arizona's - Biosphere 2 facility near Oracle, Arizona. Hundreds of people a day get the opportunity to see and play with the OmniGlobe as they wait for their tour of Biosphere 2 to begin. The OmniGlobe was installed with many Atmospheric, Oceanic and Natural Earth images and animations relating to global ecosystems, weather and changes in global climate. According to John Adams – Assistant Director of Biosphere 2, “The OmniGlobe has received nothing but rave reviews.” since installation. The OmniGlobe was funded by The George Mason Green & Lois C. Green Foundation. Following are a few photos of Biosphere 2 and the OmniGlobe in the Visitor's Center:
