

FOR IMMEDIATE RELEASE:

5/10/08 – OmniGlobe spherical display used as part of United Nations Exhibition on Climate Change. ARC Science Simulations installed a 32” OmniGlobe spherical display system as part of a United Nations exhibit on climate change. This exhibition is open to the public and will be on display in the Visitors Lobby of the United Nations Building from July 10th – August 10th, 2008. Visitors can display a variety of climate change related imagery on the OmniGlobe some of which is specific to the deterioration of the Amazon rain forest. None of the images or animations include national borders emphasizing the global, cross-border nature of these climate related issues.
